PROJECTS

CoolGrid – EV Live Demo

React.js • Node.js • Express.js • MongoDB • Socket.IO • Google Maps API • Render

- A full-stack EV charging and fuel delivery platform with secure user authentication and an end-to-end booking workflow.
- Integrated the Google Maps API for location-based charging station discovery and used Socket.IO to power real-time booking updates; deployed on Render.

YourTube Live Demo

Next.js • TypeScript • Node.js • Express.js • MongoDB • Firebase • WebRTC • Razorpay • Tailwind CSS

- A full-stack video streaming platform with user authentication, subscription management, and content upload/management tools.
- Implemented WebRTC-based video calling and screen sharing, integrated Razorpay for payments, and deployed the application on Render.

CodeLens AI (In Progress)

React.js • Node.js • MongoDB • Google Gemini API • GitHub REST API • JWT

- Building an AI-powered platform that analyzes GitHub repositories and generates automated code review reports.
- Implemented secure JWT-based authentication and repository/language analysis using the GitHub REST API.
- Integrating the Google Gemini API to deliver AI-driven code quality and architecture recommendations.
